EDMONTON, ALBERTA

JULY 6, 1972

Building Priorities, to 1976-77

The following report of the University Planning Committee was received by General Faculties Council on June 26, 1972.

At its meetings held on April 27 and 28, 1972, the University Planning Committee considered priorities for requests submitted by faculties for additional space allocations.

The material that was considered by the Committee could be classified into three main groups:

(i) the requests that had been submitted by faculties and that had been returned by September, 1971;

(ii) (a) the enrolment projections to 1980 by faculty

(b) the projections of space allocations based on these enrolment projections and applying the Donovan-Smith formula

(c) space currently held by faculties and schools and space which they would acquire over the next two or three years with the completion of buildings under construction;

(iii) a review of space that would be vacated over the next three years as a result of new buildings being completed and suggestions as to how this space might be allocated to meet the needs of faculties.

The projections of space entitlements that were based on the enrolment projections were sent to faculties and schools for their reactions prior to the consideration of priorities for 1972-73 to 1976-77.

Some faculties and schools have disputed the student enrolment projections to 1975-76 and the Committee is aware that projections are subject to considerable uncertainty.

In the calculations of class laboratory and individual facilities entitlements, an estimate of space for externally funded research personnel was added to the formula entitlement in addition to the "non-formula" space provided for in Academic Plan 8.

Space surplus or deficit calculations for 1970-71 and for 1975-76 were based on the following assumptions:

(1) Unless definitely known, it was assumed that all facilities currently occupied by a faculty or school would remain under the control of that faculty or school.

(2) It was assumed that there would be no need for classroom facilities (with the

exception of one or two large lecture theatres) other than what was currently available and what was planned in buildings currently under construction.

(3) The entitlements include requirements for class laboratory facilities for areas of study such as Mathematics, Nursing, and Business Administration and Commerce. However, most of these laboratory courses are taught in centrally scheduled facilities or laboratories controlled by other departments.

(4) There has been no adjustment for the Fine Arts unit area allowances, changes in service loads or planned enrolment increases in Medicine, Dentistry, or Pharmacy. The entitlements reflect the student mix and workload generated in 1970-71.

(5) Academic Plan 8 non-formula space guides were used.

(6) Off-campus facilities (used mainly by Agriculture and Science) have not been considered.

(7) The possible impact of Athabasca University has not been considered.

(8) Enrolment projections for 1975-76 were based on free growth.

When deciding priorities, the Committee agreed that it should emphasize the space needs of individual faculties rather than being concerned with buildings, *per se*.

For the purpose of deciding building priorities for 1972-73 to 1976-77, the Committee agreed to use the priorities list that was established in June, 1970, but to exclude Law II and the Health Sciences Centre from its current considerations. This left the following list:

Project	Space (net square feet)	Approximate budget	Planning status
Food Services	22,000	\$1,400,000	Design phase II complete
Business Administration	55,000	2,500,000	Working on design phase I
Agriculture 2—I	85,000	5,300,000	Design phase II complete
Household Economics 2	47,000	2,200,000	Design phase II complete
Education 2—II	130,000	7,000,000	No action
Medical Sciences II	72,000	3,500,000	Planning complete
Library 2	125,000	4,500,000	No action
Physical Sciences 2—I	100,000	4,000,000	No action
Fine Arts II	31,000	1,500,000	No action
Engineering 2—III	120,000	6,500,000	No action
Arts 2—II	71,000	3,000,000	No action
Services Building II		3,000,000	Program planning

The criteria established by the Committee in 1969 and approved by General Faculties Council for establishing priorities in allocating capital funds were applied.

Each member of the Committee then ranked the twelve projects listed above in his own order of priority.

The results of the ballot clearly and unanimously showed the following projects to have received top priority (in alphabetical order):

Agriculture 2—I

Medical Sciences II

Business Administration and Commerce

The Committee therefore recommends to the Board Building Committee that top priority for the period 1972-73 to 1976-77 be given to this group of buildings, with no distinction within the group. The Committee also recommends that planning and development activity be resumed immediately on these buildings, that is, that tenders be called for the completion of Medical Sciences II and active planning on Agriculture and Business Administration and Commerce be resumed.

The results of the ballot also clearly showed the following projects to have received second priority (in alphabetical order):

Food Services

Household Economics 2

Physical Sciences 2—I

The Committee therefore recommends that second priority for the period 1972-73 to 1976-77 be given to this group of buildings, with no distinction within the group. The Committee also recommends that planning on these projects be resumed when funds are available and that academic planning (no funds required) be commenced immediately

for Physical Sciences 2.

The results of the ballot clearly showed the following projects to have received third priority (in alphabetical order):

Arts 2—II

Education 2—II

Engineering 2—III

Fine Arts II

Library 2

Services Building Phase II

The Committee therefore recommends that third priority for the period 1972-73 to 1976-77 be given to this group of buildings, with no distinction within the group, but these and other buildings will be reviewed in due course.

The Committee should point out that it feels that it is important to build in the future the kind of space that is flexible enough to allow it to be adapted to alternative uses without undue expense.

The following were members of the University Planning Committee when the report was considered (their titles are given as they then were): D. G. TYNDALL (Vice-President, Finance and Administration; Chairman of the Committee), D. R. CLANDININ (Professor of Animal Science), M. HOROWITZ (Chairman of Elementary Education), H. KREISEL (Vice President, Academic), J. P. MEEKISON (Associate Dean of Graduate Studies and Research), W. D. NEAL (Vice-President, Planning and Development), G. C. NEILSON (Director of Nuclear Research Centre), S. R. SINCLAIR (Chairman of Civil Engineering), F. SLATTER (Student, Business Administration and Commerce), R. WHISTANCE-SMITH (Map Curator, Department of Geography), M. WYMAN (President of the University), and D. RAPSON (University Secretariat; Secretary to the Committee).

ALAN D. ALLBUTT 1938-1972

ALAN D. ALLBUTT, Sessional Instructor in the Department of Chemistry, died June 25 in a climbing accident on Tunnel Mountain in

Banff. Dr. Allbutt came to Canada in 1962 after obtaining the Graduate, Royal Institute of Chemistry degree from the College of Science and Technology in Bristol, England. He studied for his PhD in Chemistry at the University

of Western Ontario and was awarded the degree in 1967 for his work on the diaxial-diequatorial rearrangement. He then spent a year as a post-doctoral fellow at the Loughborough University of Technology, Loughborough, England.

His first appointment at The University of Alberta was in 1968, as a post-doctoral fellow in the Department of Chemistry. In 1969 and 1970 he was a teaching post-doctoral fellow in that department, and in 1971 he was appointed Sessional Instructor.

Dr. Allbutt had been in charge of the Chemistry 250 laboratories for the past two years and was co-author of the laboratory manual used in the course.

He is survived by his wife, Velta, and son, Jeffrey.

PEOPLE

■ J. P. DAS, Director of the University's Centre for the Study of Mental Retardation, has received a Nuffield Foundation Grant.

The Nuffield Foundation, located in London, England, was established by Lord Nuffield to make funds available for research and education in a variety of fields of interest related to the advancement of social well being.

Dr. Das's award is one of nine travel grants given to established Canadian scholars who wish to undertake advanced research which can only be carried on in the United Kingdom.

■ A. W. E. ERICKSSON, ROBERT STEADWARD, GEOFF ELLIOTT, and GERRY GLASSFORD of the Department of Physical Education, as well as several students in the Department of Physical Education, have returned from a month long visit to Japan and the People's Republic of China. While there they visited athletic institutions, universities, teacher training institutions, and numerous factories and communes. This tour, which was one of the first to be focused extensively on sport and physical culture, was comprised of twenty-five

people from different parts of Canada as well as several people from the United States.

Several papers were given by members of the group relating to education and physical education in Canada.

■ P. KRISHAN, Visiting Assistant Professor of Sociology, presented a paper at the Western Regional Meeting of the Institute of Mathematical Statistics, the Biometric Society (WNAR), and the American Statistical Association held in Seattle, Washington.

■ NAOMI HERSOM, Associate Professor of Elementary Education, has been appointed director for the Alberta phase of the Inter-provincial School Evaluation Project sponsored by the Alberta Advisory Committee for Educational Studies.

■ JOHN A. EAGLE, Assistant Professor of History, and M. KATZ, Associate Professor of History, presented papers at the annual meeting of the Learned Societies held at McGill University.

WAS ENDYMION MOONSTRUCK?

D. P. HUBE, Assistant Professor of Physics, has reminded us that on Monday, July 10 there will be a total eclipse of the sun, with the path of totality passing through northern Canada, Quebec, and the Maritimes. Observers in Edmonton will be able to see a partial eclipse beginning at 12:20 p.m. and ending at 2:46 p.m. Weather permitting, several telescopes will be set up on campus just south of the V-wing of the Physics Building. Observers are advised not to look at the sun directly during its eclipse.

A partial eclipse of the moon will occur between 11:55 p.m. on July 25 and 2:36 a.m. on July 26. This will be visible with the naked eye.

Dr. Hube did not tell us why the eclipses will occur, but we have it on good authority (*Brewer's Dictionary of Phrase and Fable*) that eclipses are bad omens. The Romans would never hold a public assembly during an eclipse. Some Greek poets imagined that an eclipse of the moon was due to the fact that Selene, the moon goddess, had gone to visit Endymion, a shepherd by whom she bore fifty daughters.

A general notion among some races was that the sun or moon had been devoured by a monster, hence the beating of drums and kettles to scare it away. The Chinese, Lapps, and

Persians called the evil beast a dragon. The East Indians said it was a black Griffin, fabled to be the offspring of the lion and the eagle.

The ancient Mexicans thought eclipses were caused by quarrels between sun and moon.

NOTICES

NEW DIRECTIONS

BLAKE PRATT, Assistant Project Officer in the Campus Development Office, says the new one-way traffic system announced in January is expected to be implemented before the fall term begins this year.

Under the new system, traffic will be one-way going north on 114 Street from University Avenue to 89 Avenue, east on 89 Avenue between 114 and 112 Streets, and south on 112 Street from 89 Avenue to 82 Avenue.

The area on 89 Avenue between 114 Street and Stadium Carpark will be closed to all traffic except emergency vehicles. Access to the carpark will be from 116 Street.

ETS buses will be re-routed on the one-way traffic loop and will make stops on 89 Avenue. It is expected that the parking meters on 114 Street, 89 Avenue, and in front of the Students' Union Building will be removed.

LIBRARY ORIENTATION PROGRAM

Summer Session teaching staff are asked to announce to their classes that orientation programs to the University Library system and the Education Library will be held during the first week of Summer Session, Tuesday, July 4 to Friday, July 7 inclusive, at 10 a.m. and again at 2 p.m.

Students are to assemble at any of the above times at the Reference Librarian's desk, main floor, Education Library, or at the Reference Department, main floor, Cameron Library.

PENSION TRANSFERS TO OR FROM THE FEDERAL GOVERNMENT

The following is a notice which appeared in FOLIO on March 2, 1972. It is reprinted at the request of the Pension Plans Division, Office of the Comptroller, as a reminder to staff of the existence of the reciprocal pension transfer agreement, and of the July 24, 1972, deadline for making application for a transfer as stated in item (4).

A Reciprocal Transfer Agreement between The University of Alberta Academic Pension Plan and the Public Service Superannuation Act of Canada became effective on January 24, 1972. Federal government employees who contributed to the Superannuation Plan and

who are now or will be contributing to the Academic Pension Plan and University staff members who contributed to the Academic Pension Plan and who are now or will be contributing to the Federal Superannuation Plan may transfer their pensionable service from one plan to the other subject to the terms of the reciprocal agreement. The main provisos of the agreement are as follows:

(1) Termination of service with the former employer must have occurred subsequent to August 1, 1964.

(2) Commencement of employment with the new employer must have occurred within three months of the date of termination of service with the former employer.

(3) Contributions must not have been withdrawn from the former plan.

(4) Application for transfer must be made on the prescribed form and delivered to the administrators of the two plans not later than July 24, 1972, or within one year of becoming a contributor to the new plan.

(5) In the case of a transfer to the Superannuation Plan, the applicant must pass a medical examination.

Staff members and former staff members who feel that they have any service which may qualify under the terms of this Reciprocal Agreement are urged to pursue the matter immediately so as not to miss the deadline. The University Pension Plans Division has no present means of knowing to whom the agreement is applicable and therefore is not in a position to send reminder notices. If you are eligible, please request an Application Form.

If you have any federal government service, or in the case of federal government employees any University service, which does not meet the requirements of our present agreement as listed above, it is suggested that you request and submit a Declaration of Service Form so that the University's records will be complete should there be future changes in the agreement which might benefit you.

The Application and Declaration forms are available from the Pension Plans Division, Office of the Comptroller, telephone 432-4756.
